Experience

JAN 2023 - MAY 2023

Uniquemark Solutions Pvt. Ltd. | Pune

Junior Developer (Intern)

- I worked under the guidance of senior developer to check & fix the bugs and to improve existing code.
- I also conducted debugging to identify and fix errors or issues in the code.
- Learnt HTML,CSS,JS for hosting the websites CORE FTP LE. After that I also worked on WordPress Software.
- Designed intuitive graphical user interfaces to improve user experience.
- Translated customer requirements into written use cases.

Projects

PORTFOLIO WEBSITE

- **Objective:** Showcase skills, projects, and experience in a visually appealing and user-friendly manner.
- **Features:** Responsive design for optimal viewing across devices. Interactive elements to engage users (e.g., animations, hover effects). Sections for About Me, Projects, Skills, and Contact.
- **Technologies Used:** HTML5 for markup.CSS3 for styling, including Flex-box or Grid for layout. JavaScript for interactivity and dynamic content.
- **Development Process:** Initial planning and wireframing to outline the site's structure and design. Iterative development and testing to ensure functionality and responsiveness.
- **Outcome:** A visually appealing and functional portfolio website that effectively showcases skills and projects.

Smart Glasses for Multimeter

- **Innovative application:** Developed a smart glasses technology integration with multimeters to enhance functionality.
- **Hands-free monitoring:** Smart glasses enable technicians to view multimeter readings and diagnostics without the need to hold the device.
- **Technologies Utilized:** Bluetooth or Wi-Fi communication protocols. Prototyping tools like Arduino or Raspberry Pi for initial development.

Employee Management System

- **Application** -I have Created an employee management system to handle employee details, payroll, and attendance.
- **Description** :- Developed a Java application that supports CRUD operations for employee data, payroll calculations, and attendance tracking.
- **Technologies** :- Java, JavaSwing for UI, Database (e.g., MySQL) for data storage. You can use other technologies that you know.
